CAROS

HVAC / PRACTICAL GUIDE

The Maintenance Agreement Machine

Renewal Scripts + Automation Map

Illustrative generated scene.

REVENUE FIRST.

The agreement sold. The renewal disappeared.

It's Friday. Dispatch is rearranging three calls. A technician needs a part number. Your renewal list is still a spreadsheet.

Somewhere on that sheet is a homeowner who likes your company. Their agreement expires next week. Nobody has asked them to stay.

None of these are failures of good HVAC pros. They're failures of process.

This guide gives you a repeatable way to identify upcoming renewals, explain the value, and follow through. You'll get a data checklist, a workflow map, ready-to-adapt messages, and a scorecard.

Revenue first. Start with agreements already approaching expiration before building a bigger membership campaign.

Your working goal: Every eligible agreement gets an accurate renewal invitation, a named owner, and a recorded outcome.

Before you begin: Choose one person to own the renewal queue. Give them access to current agreement terms, payment status, service history, and actual scheduling availability.

The scripts use bracketed fields. Replace every field with verified information before sending. All dollar examples in this guide are hypothetical planning math, not CAROS results or industry benchmarks.

Build a list your team can trust

Export agreements expiring in the next 60 days. Start with a small batch your office can check manually.

Capture these fields:

Field	What to verify
Customer and agreement ID	One record per agreement; merge duplicate contacts carefully
Service address	Still served by your business; current customer or authorized contact
Expiration date	Actual coverage end date, not the last invoice date
Renewal type	Manual renewal or an existing automatic-renewal arrangement
Current and renewal terms	Approved price, covered equipment, benefits, exclusions
Service fulfillment	Visits completed, visits still owed, open complaints
Contact preferences	Permitted channel, local time, opt-outs, communication history
Payment status	Current, failed, disputed, or awaiting reconciliation
Queue owner and next action	Named person, due date, current state

Hold these records for human review: disputed charges, unresolved service problems, uncertain ownership, incorrect equipment records, or unclear agreement terms.

A reminder cannot fix a visit you still owe. Route that problem to someone who can.

For automatic-renewal plans, use the applicable notice and payment process. Don't send a manual renewal pitch that suggests a second purchase is required.

Working-list template

Agreement ID | Contact | End date | Renewal type | Approved offer | Visits owed | Channel | Status | Owner | Next action

Map the renewal workflow

Use this as a starting cadence for manually renewed agreements. Adjust timing to your terms, customer preferences, and office capacity.

Daily trigger: An agreement enters the 30-day renewal window.

Eligibility check: Confirm current terms, contact permission, service fulfillment, payment state, and record accuracy.

If eligible: Send the 30-day invitation. Create a renewal task with a named owner.

If the customer replies: Pause the sequence immediately. Assign the conversation to the owner.

If the customer renews: Confirm payment and agreement activation in the source system. Stop all renewal reminders. Send confirmation and offer tune-up scheduling separately.

If there is no response: Recheck eligibility before each next touch. Send a 14-day reminder, then create a seven-day call task.

At expiration: Verify the agreement is still unrenewed. Send an accurate status notice. Never imply coverage remains active when it doesn't.

Seven days after expiration: If appropriate, offer a final conversation about restarting. Then close the sequence as lapsed or deferred.

Stop rules: Renewal confirmed; customer declines; opt-out; wrong contact; open dispute; service complaint; duplicate record; or manual hold.

Human handoffs: Questions about coverage, price objections, billing problems, exceptions, and any uncertainty about safety or equipment condition.

Automation where it makes sense, humans where they matter.

Copy the renewal messages

30 days before expiration: email

Subject: Your [Company] maintenance agreement ends [date]

Hi [First name],

Your maintenance agreement for [service address] ends on [date].

Your renewal option is [approved price] for [term]. It includes [verified benefits]. You can review the full terms here: [secure terms link].

Would you like to renew, ask a question, or review a different option?

Use [secure renewal link], or reply and [owner name] will help.

Thanks for trusting [Company] with your home.

[Signature]

14 days before expiration: text

Hi [First name], it's [Company]. Your maintenance agreement ends [date]. Want the renewal details or help with a question? Reply here or call [number]. Reply STOP to opt out.

Seven days before expiration: call opener

“Hi [First name], this is [Name] with [Company]. Is now a good time for a quick question about your maintenance agreement?

“It ends on [date]. I'm checking whether you'd like to renew or talk through anything first.”

Then listen. Confirm the actual price and benefits before requesting a decision.

Voicemail

“Hi [First name], this is [Name] at [Company], calling about your maintenance agreement. Please call me at [number] when convenient. Again, that's [number]. Thank you.”

Keep detailed account information out of voicemail.

Handle the answer like a person

“We didn't use it.”

“Let's review what was included and which visits were completed. If we still owe a visit, I'll address that first. Then we can decide whether renewal makes sense for you.”

“It's too expensive.”

“Understood. The renewal is [approved price] for [term], including [verified benefits]. Which part feels hardest to justify? I can explain the options we actually offer.”

Don't invent a discount, repair saving, or payback claim.

“Call me later.”

“Of course. What date and channel work best? Your current agreement ends [date]. I'll record your preference so we don't keep sending reminders.”

Pause the sequence and set the requested task.

“We moved.”

“Thanks for letting us know. I'll update the account and stop renewal reminders for that address. Is there anything unresolved that our office should help with?”

Don't transfer an agreement or contact a new resident without checking the applicable process.

“We already renewed.”

“Thanks for flagging it. I'll pause the reminders and verify the account. You shouldn't need to renew twice.”

Reconcile records before taking another payment.

“We had a bad experience.”

“I'm sorry we let you down. What happened? I'll stop the renewal messages and have [responsible person] follow up by [realistic time].”

Keep the promise. A service recovery conversation belongs with a person.

Close the loop after the decision

Renewal confirmation: email

Subject: Your [Company] maintenance agreement is renewed

Hi [First name],

Your renewal is confirmed for [verified term dates] at [approved amount and billing terms].

Your agreement covers [verified scope]. Review your agreement here: [secure document link].

[If a visit is due: Choose an available tune-up appointment here: [live booking link].]

Questions? Reply or call [number]. We're glad to keep serving you.

[Signature]

Expiration notice: email

Subject: An update on your maintenance agreement

Hi [First name],

Our records show your maintenance agreement ended on [verified date] and hasn't renewed.

If you'd like to discuss restarting, reply or call [number]. We'll confirm the current terms and any applicable restart requirements before you decide.

If you've already renewed, please let us know so we can correct the record.

[Signature]

Final lapsed-plan check-in: email

Subject: Should we close your renewal reminder?

Hi [First name],

Would you like help reviewing a maintenance agreement for [address], or should we close this renewal reminder?

Either answer is useful. Reply with your preference and we'll update the account.

[Signature]

Scheduling rule: A requested appointment isn't a confirmed appointment. Confirm only after the slot is accepted in your scheduling system.

Count renewals, not reminder volume

Use one expiration cohort: all agreements due to expire in the same month.

Track eligible agreements, invitations delivered, replies, renewals, explicit declines, deferred decisions, and unresolved records. Keep delivery failures visible.

Renewal rate: Agreements renewed ÷ eligible agreements due to expire.

Example: 60 renewals ÷ 100 eligible agreements = 60% renewal rate.

If another 10 customers renew at an illustrative $240 annual price:

10 × $240 = $2,400 in additional annual agreement sales.

That is revenue, not profit. It excludes service-delivery costs, discounts, refunds, and taxes. Count invoiced, collected, and recognized amounts separately where relevant.

Don't multiply that figure by an assumed customer lifetime and call it recovered cash.

Weekly scorecard

Measure	This week	Owner/action
Agreements approaching expiration	___	___
Eligible records with accurate terms	___	___
Renewal conversations awaiting a person	___	___
Renewals confirmed	___	___
Delivery failures or wrong contacts	___	___
Service issues blocking renewal	___	___
Staff time spent on renewal administration	___	___

Compare similar cohorts. A seasonal change, price change, or different customer mix can affect the result.

Launch one reliable loop

Day 1: Name the owner. Export a small upcoming-expiration cohort. Check terms and visit fulfillment.

Day 2: Approve messages, channel rules, handoffs, and stop conditions. Set realistic response times.

Day 3: Test with internal records. Simulate renewal, a reply, an opt-out, duplicate data, and a complaint.

Day 4: Send to a small eligible batch. Watch replies and record updates before expanding.

Day 5: Review outcomes with the office. Fix incorrect fields and unresolved handoffs first.

Launch checklist

[ ] Prices, dates, benefits, and links verified.

[ ] Existing automatic-renewal customers follow the correct separate process.

[ ] Channel permissions and contact preferences checked.

[ ] Replies, declines, opt-outs, and renewals stop further reminders.

[ ] Complaints and billing questions reach a named person.

[ ] Scheduling uses real availability.

[ ] Revenue reporting separates sales from collected cash and profit.

Your database shouldn't be a digital graveyard. Give each agreement a next action and each customer a clear choice.

Learn. Measure. Audit.

Use the Customer Value & Retention Calculator to explore what different retention assumptions could mean for your business.

Then request the Free Business Audit through CAROS Free Resources. Bring your renewal list, current agreement terms, and unanswered questions. Start with the process that needs attention first.
